

**EXODISS** PG70

Non-flammable wetting agent

# EXODISS PG70

**EXODISS PG70** is a highly efficient **wetting, dispersion and emulsifying** agent used in a wide range of applications like inks, paints and coatings, emulsion polymerization, adhesives, textiles, crop protection...

## Product description

Dioctyl sodium sulfosuccinate in water and propylene glycol

## Benefits

- **Powerful wetting agent**
- **Excellent leveling and dispersing properties**
- **Efficient primary or co-emulsifier**
- **Low surface tension**
- **Effective at low dosage level**
- **Poor foaming**

## Because we care

Suitable for various food contact applications

▪  
Non-flammable liquid

▪  
Biodegradable ingredients

▪  
Preservative free

▪  
No ingredients of animal origin

▪  
No SVHC  
(substances of very high concern)

---

EOC continuously improves its environmental and health profile whilst providing high-performance products.

## Food contact

The chemical substances in Exodiss PG70 are listed in:

- FDA (§175.105, § 175.300, § 175.320, § 176.170, § 176.180)
- EU 10/2011 – Annex 1\*
- BfR Recommendation Chapter XIV\*
- Swiss Ordinance Annex 10\*

\*For SML (specific migration limits) and/or restrictions see food contact statements
